SUMMARY

Recent IT graduate with hands-on experience building and shipping real software across two internships and a freelance job. Proficient in JavaScript, TypeScript, React, Node.js, and Python, with experience in REST API integrations, AI workflows, and database management using MongoDB and Supabase. I take ownership of my work, collaborate well across teams, and I'm genuinely passionate about building things that work in production

SKILLS

- Professional skills:** Communication, Adaptability, Time Management, Teamwork, Eager to Learn, Problem-solving
- Technical skills:** JavaScript, TypeScript, React, Next.js, Node.js, Python, Machine Learning: PyTorch, scikit-learn, NumPy, Pandas, Supabase, MongoDB, SQL, REST APIs, Git, AI Agentic, LLM Integration

EXPERIENCE

Software Developer Intern - Hyperlocalise

📅 08/2026 - Present 📍 Sydney, Australia 🌐 <https://www.hyperlocalise.com/>

- An agentic localisation platform in the Startmate accelerator that helps teams launch globally in days, not weeks. Working on frontend development during the fundraising phase, within a clean, well-structured production codebase with strong typing and automated code review.

Software Engineer - Freelance

PitchUp

📅 06/2026 - Present 📍 Sydney, Australia 🌐 <https://www.pitchup.com.au/>

- Owned end-to-end delivery of a calendar sync feature (Google + Microsoft). Identified and resolved a security vulnerability in the authentication flow (insecure Base64-encoded venue ID), recommending and implementing HMAC signing to prevent request tampering
- Implemented a booking hold feature, reducing double-booking incidents during checkout by temporarily reserving slots for a 10-minute window. Built a secure email accept/deny flow for booking requests using signed tokens, FastAPI, and React as part of a sports venue booking platform
- Building a **browser-agent AI demo built** on top of open-source frameworks for **an investor presentation (AO Startups)**

Software Engineer Intern

PitchUp

📅 05/2025 - 7/2025 📍 Sydney, Australia

- Took ownership of frontend development, improving UI/UX using React (TypeScript)
- Developed and deployed web scraping tools extracting data from 600+ dynamic websites with stable performance
- Built full-stack features (Auth, Database, Edge Functions, Python) and collaborated with non-technical stakeholders to turn ideas into functional features

Software Engineer Intern

CliniScribe

📅 07/2024 - 03/2025 📍 Sydney, Australia 🌐 <https://clinscribe.ai/>

- Took full ownership of the design and development of an AI-powered NDIS report feature, from planning to deployment
- Built clinical notes features using AI to analyse dictation and medical reports, increasing customer engagement by 15% and reducing processing time by 10%
- Integrated React with APIs, connecting to Ruby on Rails and third-party services using Python

PROJECTS

May Day

🌐 <https://may-day.vercel.app/>

- Personal journaling application built with Next.js, MongoDB, and OpenAI integration for AI-driven mood insights. Learned to design structured AI prompts, empathetic AI voice for mood reflection, moving from generic chatbot-style responses to insights. Currently refactoring the codebase for cleaner architecture and continuously improving the app's features and user experience as I learn

EDUCATION

Bachelor's in Information Technology

Kaplan Business School 📅 11/2023 - 06/2026 📍 Sydney, Australia Grade: 6.5/7 - Distinction

CERTIFICATION

JavaScript Data Structures & Algorithms (Udemy) | Multi AI Agent Systems (CrewAI, DeepLearning.AI) | Generative AI for Everyone (DeepLearning.AI) | Foundation of UX Design (Google) | UI Designer (Mirr Design)
